Wah Loon **Keng**

DIRECTOR OF AI ARCHITECTURE

kengzwl@gmail.com
github.com/kengz
New York City

Updated May 2026

LINKS

GitHub · kengz

LinkedIn · wlkeng

Scholar · Wah Loon Keng

SKILLS

ML / AI

PyTorch · LLMs · Agentic AI
Reinforcement Learning

Infra / Cloud

Kubernetes · Helm · Terraform
AWS · GCP

EDUCATION

Lafayette College

BS Mathematics · Minor in Physics
Dec 2015 · Easton, PA
GPA: 3.83 / 4.0

AWARDS

- AI Grant Spring 2017 finalist — OpenAI Lab
- 2014 Lafayette College Benjamin F. Barge Mathematical Prize
- 2014 Pi Mu Epsilon honorary national mathematics society

EXPERIENCE

Electronic Arts · Director of AI Architecture *Jul 2022 — Present · New York City*

Design, build, and scale EA's central AI Platform: cloud training and Kubernetes serving infra, GenAI Gateway for unified, governed access to all AI models, and AI agents platform. Shape EA's central AI standards and governance.

AppLovin · Senior AI Engineer *Jun 2020 — Jul 2022 · Palo Alto, CA / Remote*

Built and operated production deep learning systems on Kubernetes, including fraud detection models protecting revenue across the game portfolio. Expanded into recommendation systems for in-app purchases.

Machine Zone · Senior AI Engineer *Apr 2018 — May 2020 · Palo Alto, CA*

Built and operated production deep learning systems on Kubernetes, including fraud detection models running across all games as critical revenue protection. Also contributed to RL research projects.

Eligible · Software Engineer *Mar 2016 — Apr 2018 · Brooklyn, NY*

Machine learning algorithms for search products and internal ML platform; Python libraries for the data science team.

RESEARCH

Perimeter Institute · Student Researcher *Summer 2014 · Waterloo, Canada*

Quantum Foundations — quantum paradoxes in the C3 causal structure using quantum computation. Advisors: Matthew Pusey and Tobias Fritz.

Lafayette College · EXCEL Researcher *Summers 2013, 2015 · Easton, PA*

Vertex Cover NP-hard complexity via Measure and Conquer; Yao Graphs shortest path and spanning ratios for k=5. Advisor: Prof. Ge Xia. SOCG'14 publication.

PROJECTS

SLM Lab	Modular deep reinforcement learning framework in PyTorch.
TorchArc	Build PyTorch networks by specifying architectures.
feature_transform	Build ColumnTransformers by specifying configs.
lean-dl-example	Template for a lean, config-driven deep learning project.
OpenAI Lab	An experimentation framework for deep reinforcement learning.

PUBLICATIONS & TALKS

1. Book: *Foundations of Deep Reinforcement Learning: Theory and Practice in Python.* Graesser & Keng, Addison-Wesley, 2019.
2. "Scalable AI Infrastructure in the Gaming Industry" — NVIDIA GTC 2025.
3. "Next-Gen Infrastructure for Scalable AI/ML at EA" — GDC 2025.
4. *Deep Reinforcement Learning with Wah Loon Keng.* SuperDataScience podcast ep. 551, 2022.
5. SLM Lab posters — PyTorch Developer Conference 2018, 2019.
6. Numerous talks and tutorials on deep reinforcement learning and SLM Lab.
7. Barba et al. *New and Improved Spanning Ratios for Yao Graphs.* SOCG'14.
